DATE MAILED: 05/02/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

## Office Action Summary

**Application No.**

10/024,323

**Applicant(s)**

MIYATSU ET AL.

**Examiner**

Alexander Jamal

**Art Unit**

2643

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 14 December 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-44 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-44 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5,18,27-31,36,37,43, rejected under 35 U.S.C. 102(e) as being anticipated by Kotzin et al. (6470180).

As per **claim 1**, Kotzin discloses a local wireless network between devices 202, 206 and 209 (Fig. 2), and an external network (bluetooth) between devices 202, and 215. Transmitter 215 is used to download software to interface devices (mobile phones) 202 (ABSTRACT).

As per **claim 18**, claim rejected for same reasons as claim 1 rejection. The software downloaded to the terminals 202 establishes a functional relationship (such as data used in an online game) between the terminals and the application end device (which may be any of devices 215,212,209 used to implement functions of the game) (Col 3 lines 5-21).

As per **claim 28**, claim 28 rejected for same reasons as claim 1 rejection. The terminals may be mobile phones. The phones comprise interfaces to communicate in the external network (Fig. 2).

Art Unit: 2643

As per **claim 36**, claim rejected as a method performed by the device of the claim 28 rejection.

As per **claims 2,3,4,27,29,30,37,43**, the system may be a wireless cellular system with mobile phone that communicates on an external bluetooth network (Col 2 lines 33-53, Col 3 line 60 to Col 4 line 5).

As per **claims 5,31**, claim rejected for same reasons as claim 18 rejection.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. **Claims 6,7,11-17,22-26,32,38-39,44**, rejected under 35 U.S.C. 103(a) as being unpatentable over Kotzin et al. (6470180) as applied to claims 1,5,18,28,36, above, and further in view of Freeny Jr. (6490443).

As per **claims 6,7,11-15,22-26,32,34**, Kotzin discloses applicant's claims 1,5,18,28,36, but does not specify that the downloading system comprises a private key encryption security system.

Freeny discloses a communication system comprised of at least two networks (one of which may be a Bluetooth network) (Col 38 lines 25-35) that uses public key encryption to only allow appropriate subscribers to access the data being sent (Col 38 lines 33-48). It would have been obvious to one of ordinary skill in the art at the time of this application to implement private key encryption in the bluetooth network for the purpose of only allowing the appropriate subscribers to access the downloaded data.

As per **claims 16,17,38,39**, the online gaming server of Kotzin in view of Freeny inherently comprises an operator for the purpose of operating the server. The operator is a certification authority for the online game (which includes the local and external networks).

**5. Claims 8-10,19-21,33-35**, rejected under 35 U.S.C. 103(a) as being unpatentable over Kotzin et al. (6470180) as applied to claims 1,5,18,28, above, and further in view of Nelson (6823184).

As per **claim 8-10,19-21,33-35**, Kotzin discloses applicant's claims 1,5,18,28, and discloses that the communication system may be coupled to the internet (Col 3 lines 44-50) to play an online game. The online game inherently requires an interface including a port between the user terminal and the application end device for the purpose of allowing communication between the devices. However, Kotzin does not specify that the interface comprises JAVA application programming.

Nelson discloses a Bluetooth communication system (Col 11 lines 40-52) in which software enabling an interface for the user terminal is downloaded to the terminal devices in the form of JAVA applets (Col 10 lines 43-46). It would have been obvious to one of ordinary skill in the art at the time of this application that Kotzin's system (which may be coupled to the internet) could implement the application software (and hence the interface back to the online game server) in the form of JAVA applets for the advantage of using a well known programming standard that is compatible with the widely used internet.

6. **Claims 40-42**, rejected under 35 U.S.C. 103(a) as being unpatentable over Kotzin et al. (6470180) as applied to claims 36 above.

As per **claims 40-42**, Kotzin discloses applicant's claim 36, but does not specify any fee charging for the software download. It would have been obvious to one of ordinary skill in the art at the time of this application that various owners of network elements (hardware, software ect.) should charge others for the use of the elements for the advantage of financially supporting the elements (and the people involved in producing them).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Jamal whose telephone number is 571-272-7498. The examiner can normally be reached on M-F 9AM-6PM.

Art Unit: 2643

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Curtis A Kuntz can be reached on 571-272-7499. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9306 for regular communications and 703-872-9315 for After Final communications.
